## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

## Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classificatcn And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

## SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

**Patent Fees**

*Agency:* Patent and Trademark Office. Commerce
*Action*: Interim Rule
*Summary*: The Omnibus Budget Reconciliation Act of 1990 imposes a 69% surcharge on fees charged under 35 U.S.C. § 41(a) and (b). The surcharge took effect on November 5, 1990. By this notice, the Patent and Trademark Office (Office) is informing the public of the patent fees affected and the new amounts including the surcharge.
*Effective Date*: As required by the Omnibus Budget Reconciliation Act, the fees in this interim rule are effective November 5, 1990. Consideration will be given to comments received on or before January 25, 1991.
*Addresses*: Address written comments to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, Attention: Frances Michalkewicz, Suite 904, Building 2, Crystal Park. Written comments will be available for public inspection in Suite 904 of Building 2, Crystal Park, at 2121 Crystal Drive, Arlington, Virginia.
*For Further Information Contact*: Frances Michalkewicz by telephone at (703) 557-1610 or by mail to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231

**Supplementary Information**

The Patent and Trademark Office is required by the Omnibus Budget Reconciliation Act of 1990 to apply a 69% surcharge to patent fees charged under 35 U.S.C. § 41(a) and (b). By this Act, the 69% surcharge is rounded by standard arithmetic rules. The Office has applied standard arithmetic rules so that the amounts rounded would be *de minimis* and convenient to the user.

For entities other than small entities, amounts of $100 or more were rounded to the nearest $10. Amounts between $10 and $99 were rounded to the nearest even number so that the comparable small entity fee would be a whole number. For small entities, the Office then reduced the fee by 50% as required by 35 U.S.C. § 41(h).

Any fee under 35 U.S.C. § 41(a) and (b) which is paid on or after November 5, 1990, is subject to the surcharge. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing under 37 CFR § 1.8 or a proper Certificate of Express Mail under 37 CFR § 1.10 will be considered to be the date of receipt in the Office.

Since, by law, this surcharge became effective on November 5, 1990, and the law provided no discretion to the Office, this rule is effective as of that date.

**Other Considerations**

The rule change is in conformity with the requirements of the Regulatory Fexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act, 44 U.S.C. § 3501 *et seq*. There are no information collection requirements related to patent fee rules.

The Office has determined that this notice has no Federalism implications affecting relations between the National Government and the States as outlined in Executive Order 12612.

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million because the additional revenue that the surcharge collects will be offset by a reduction in the Office's appropriation from the general revenues of the United States. While there will be an increase in patent fees, they are required by law, and the Office is without discretion to reduce them.

The Office has determined that good cause exists for dispensing with the requirements under 5 U.S.C. § 553 of notice and comment and delayed effective date. These procedures are impracticable because the Omnibus Budget Reconciliation Act of 1990 imposed a surcharge on fees set under 35 U.S.C. § 41(a) and (b) effective November 5, 1990. Therefore, this rule is being issued as an interim final rule effective November 5, 1990. Comments received by January 25, 1991 will be considered in drafting the final rule.

Because a notice of proposed rulemaking is not required by 5 U.S.C. § 553(b)(B) or any other law, a Regulatory Flexibility Analysis is not required and has not been prepared for purposes of the Regulatory Flexibility Act.

*Address*: Address correspondence to Assistant Commissioner for External Affairs, United States Patent and Trademark Office, Washington, D.C. 20231.
*For Further Information Contact*: Michael K. Kirk, Assistant Commissioner for External Affairs, United States Patent and Trademark Office, Box 4, Washington, D.C. 20231.
*Supplementary Information:* The Commissioner of Patents and Trademarks has been delegated the task of determining when and under what conditions interim protection in the United States will be extended under section 914 of the SCPA to owners of foreign "mask works," the series of related images representing a three-dimensional pattern in the layers of a semiconductor chip. In international parlance, mask works are also known as "integrated circuit layout designs" or as "topographies." To be eligible for interim mask work protection, it must be established that a foreign government is making good faith efforts and reasonable progress toward establishing a regime of protection substantially similar to that established under the SCPA, and that U.S. mask works are not subject to unauthorized distribution or commercial exploitation in the country concerned.

In November 1987, the Congress extended the President's authority to issue interim orders until July 1, 1991. Pub.L. No. 100-159 (1987). In doing so, Congress expressed its belief that "this process [under section 914] is promoting the protection of U.S. mask works abroad." H. Rpt. 100-388, 100th Cong., 1st Sess. (1987).

Interim orders have been issued extending protection to 19 States. *See* 54 FR 50793 (Dec. 11, 1989).

**Discussion and Findings of the Commissioner**

Representative Robert W. Kastenmeier, Chairman of the House Judiciary Subcommittee on Courts, Intellectual Property and the Administration of Justice, has stated that the transitional provisions in section 914 were "intended to encourage the rapid development of a new worldwide regime for the protection of semiconductor chips." 133 Cong. Rec. E1283 (daily ed. Apr. 6, 1987). When the SCPA was enacted in 1984, and when the President's authority under seciton 914 was extended in 1987, it was contemplated that the then-draft World Intellectual Property Organization (WIPO) "Treaty on Intellectual Property in Respect of Integrated Circuits" would provide the basis for a multilateral regime of protection for semiconductor chip layout designs. *Id.*

When the interim orders were last extended in Dec. 1989, the Commissioner noted that substantial compromises were reached at the May 1989 diplomatic conference for conclusion of the WIPO treaty. The Commissioner stated that these compromises had produced a treaty with levels of protection below the international norms reflected in the laws of the countries that have enacted chip protection legislation.

Separate negotiations to establish a multilateral standard of chip protection are under way within the framework of the Uruguay Round of multilateral trade negotiations under the General Agreement on Tariffs and Trade (GATT), which is to conclude in Dec. 1990. In negotiations within the Trade Related Aspects of Intellectual Property Rights (TRIPS) sub-group of the Uruguay Round, the United States is seeking to establish a standard providing higher levels of chip protection than those contained in the WIPO treaty.

In the early months of 1991, the Congress must consider whether to extend the President's interim authority under section 914. Congress should take into account the fact that the WIPO treaty does not provide an acceptable multilateral basis for protection for chip layout designs. The results of the TRIPS negotiations, and their implications for the creation of a viable multilateral regime, should also be considered.

The Commissioner set forth his views on extension of section 914 in his July 1990 *Report on the Operation of Section 914 of the Semiconductor Chip Protection Act of 1984* (Report), submitted to Congress in consultation with the Register of Copyrights. The Commissioner stated:

> Our continuing experience in the administration of section 914, when coupled with our negotiations on multilateral agreements designed to promote international comity with respect to the protection of mask works, continue to point out the balanced level of protection set in the SCPA. ...[T]he procedures implemented under section 914 continue to have an important role in the administration of the SCPA and the internationalization of standards for chip protection.

*Report* at 34.

If Congress decides that extension of section 914 is justified, the duration of such authority must also be considered. In the Report, the Commissioner urged an indefinite extension, stating that "the flexibility of such procedures has helped promote the rapid growth of sound and balanced foreign laws on chip protection that do not create trade problems." *Id.*

In the meantime, the Commissioner has determined that the interim orders for all countries now subject to protection under section 914 should be extended until the expiration of statutory authority to grant such orders; that is, until July 1, 1991. Many of these countries have enacted laws providing protection on a level substantially similar to that of the SCPA, and the Commissioner notes with approval that legislation providing such protection is nearing completion in all other countries subject to section 914 orders.

No evidence has been presented that national, domiciliaries or sovereign authorities of any country subject to interim protection orders are engaged in the misappropriation, unauthorized distribution, or unauthorized commercial exploitation of mask works.

ORDER EXTENDING THE EXPIRATION DATE FOR INTERIM PROTECTION ORDERS ISSUED UNDER CHAPTER 9 OF TITLE 17, UNITED STATES CODE

In accordance with the authority vested in me by Amendment 2 to Department Organization Order 10-14 regarding 17 U.S.C. §914, I find that the Governments of Australia, Austria, Belgium, Canada, Denmark, Finland, France, the Federal Republic of Germany, Greece, Ireland, Italy, Japan, Luxembourg, the Netherlands, Portugal, Spain, Sweden, Switzerland and the United Kingdom have made and are making good faith efforts toward providing protection for U.S. mask works. I find further that nationals, domiciliaries and sovereign authorities of those countries, and persons controlled by them, are not engaged in the misappropriation, unauthorized distribution or unauthorized commercial exploitation of mask works. I find further that the extension of the expiration dates for interim orders will promote the purposes of the Semiconductor Chip Protection Act of 1984 and international comity with respect to the protection of mask works.

Accordingly, the existing interim orders for all of the aforementioned countries are extended and shall terminate on July 1, 1991.

## Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System): which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

# MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

# SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

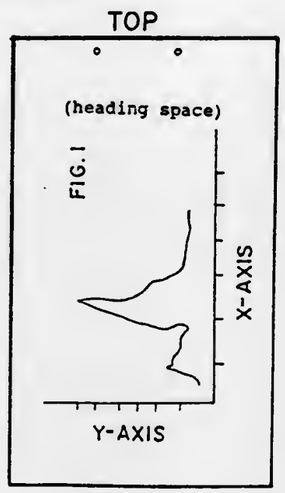
**Notice**

Drawings. Rule 37 CFR 1.84(j), Arrangement of views, is being strictly enforced. The Rule states:



"(j) **Arrangement of views.** All views on the same sheet should stand in the same direction and, if possible, stand so that they can be read with the sheet held in an upright position. If views longer than the width of the sheet are necessary for the clearest illustration of the invention, the sheet may be turned on its side so that the top of the sheet with the appropriate top margin to be used as the heading space is on the right-hand side. One figure must not be placed upon another or within the outline of another."

Words must appear in a horizontal, left-to-right fashion when the page is either upright or turned clockwise 90° with the top on the right side. Example A below is improper because the words "Y-AXIS" do not meet the rule's requirement. Example B below demonstrates the proper procedure. The words "heading space" are included for demonstration purposes.

## Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification*, *Index to the U.S. Patent Classification*, *Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

# MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

## SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
